***Trinity Consultants
American Chemistry Council
Robinson + Cole***

MCTA's winter program will focus on permitting and compliance for issues regarding air emissions, odor, and noise and how pollution prevention can be an effective way to achieve BACT compliance. The four-hour session will include audit policy & enforcement updates; an overview of online permitting/eDEP; modeling and being a good neighbor; an update on ODS regulations; a case study where shutting off the oxidizer was approved as BACT; negotiating stack testing; and, a panel discussion on Massachusetts policies and regulatory changes in light of recent Federal policy shifts such as NSR permitting applicability and "once in, always in" for hazardous air pollutant controls, and how they may impact you.

MCTA has reserved a limited number of rooms at the Parker House at a rate of \$204.86 (including fees and taxes) for those interested in staying in Boston after the reception.

Sponsorship Opportunities are Available. For more information, contact Katherine Robertson at katherine@masscta.org
